DISH REVISION 23
NOTICE OF CORRECTION
JULY 2018

The following corrections have already been approved and recorded for the implementation of DISH Revision 23.

This notice is to be used in conjunction with DISH23 publication and is made available on the DISH and BDISG websites.

DISH CHAPTER 2 – General Specifications

- *Section 2.4.7 / Data Element Status:*

  Amendment to Conditional definition as reflected below:

  C   Conditional

  A conditional data element contains information that may be required as part of the data exchange based upon specific conditions.

  Examples of conditions that may dictate provision of conditional data elements include: RET Validation, Transaction Type, Form of Payment Type or Record Specific conditions.

  Any auditing of conditional data elements should be based on what is described in the Condition or RET Validation sections of the Glossary or the Record Grid for each data element.

  If no special conditions apply, a conditional data element will be supplied if available to the reporting programs of the ticketing system.

DISH CHAPTER 5 – Agent Reporting Data (RET)

- *Section 5.5.15.1 / IT0V Record Layout*:

  Amendment to Status (from M to C) for 2nd and 3rd Tax Information Lines for TXSN, TXID and TXIN data elements #6-11 as reflected below.
